

**Sterne, Kessler, Goldstein & Fox Earns *Washington Post*
“Top Workplace” Distinction for Fourth Consecutive Year**

WASHINGTON, DC (June 19, 2017) – Sterne, Kessler, Goldstein & Fox has been recognized by *The Washington Post* among 150 of the "Top Workplaces" in the Greater Washington, DC area for the fourth consecutive year. *The Washington Post's* Top Workplaces distinction spotlights private, public, nonprofit and government agencies with the highest ratings from their employees based on a survey administered by Workplace Dynamics.

This year, Sterne Kessler is one of only six law firms present in the rankings. In profiling the firm, *The Washington Post* editors highlighted Sterne Kessler for its lawyers' intricate understanding of clients' products; in-house barista bar that is free for employees and their guests; and its overall great atmosphere.

Highlighted comments from the firm's employees that completed the survey included, "People are friendly and fun while being good at what they do." Another remarked, "I feel like a part of something special."

The Washington Post selects companies for the "Top Workplace" recognition based solely on employee feedback from across the Greater Washington, DC area. The process began with surveying employees to nominate deserving companies, a questionnaire was then disseminated to employees in the region and concluded with workplaces being ranked according to both size and employee reviews.

To view the full roster of the top workplaces, please visit [The Washington Post](http://www.washingtonpost.com/top-workplaces) website.

About Sterne Kessler

Founded in 1978 and based in Washington, DC, Sterne Kessler is dedicated exclusively to the protection, transfer, and enforcement of intellectual property rights. Our team of attorneys, registered patent agents, students, and technical specialists include some of the country's most respected practitioners of intellectual property law. Most of our professionals hold an advanced level degree, including more than 50 masters degrees and almost 55 with a doctorate in science or engineering -- credentials wide and deep enough to fill the faculty of a science-oriented university.
